Detailed Action

This application contains claims directed to the following patentably distinct species of the claimed invention:

- 1.) the single species of figures 4, 5, and 6, directed to cooled semiconductors in an inverter based stud welder (claims 1-5 are directed to this species);
- 2.) the species of figure 9 directed to a stud welder with a high voltage generator (claims 15 and 16 are directed to this species with parent claim 1 as a sub-generic claim);
- 3.) the species of figure 10 directed to a stud welder with an electrical storage device (claim 19 is directed to this species);
- 4.) the species of claims 13 and 14 directed to a stud welder with a controlled current output (claim 1 is a sub-generic claim for this species - no particular drawing figure is associated with this species);
- 5.) the species of claims 9, 10, 17, and 18 directed to a stud welder with the process controlled on the basis of process energy (no particular drawing figure is associated with this species);

Art Unit: 1725

6.) the species of claim 11 directed to a stud welder wherein the position of the stud is regulated to maintain constant arc voltage (no particular drawing figure is associated with this species);

7.) the species of claim 12 directed to a stud welder which includes control based on the resistance of the stud, cables, and gun (no particular drawing figure is associated with this species);

8.) the species of claims 5-8 directed to a stud welder with constant power output (no particular drawing figure is associated with this species).

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication should be directed to Clifford C Shaw at telephone number 703-308-1712. The examiner can normally be reached on Monday through Friday of the first week of the pay period and on Tuesday through Friday of the second week of the pay period.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Thomas G. Dunn, can be reached at 703-308-3318. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
